

IF610

Effective in all situations, this plenum filter with an M5 efficiency is composed of impregnated synthetic polyester fibers with a progressive structure reinforced by a weft allowing an optimal filtration in the duration.

IF610

APPLICATIONS:

- Perfectly adapted to industrial paint booths and bodywork
- The guarantee of a healthy environment in the paint booth
- Perfect air distribution in the cabin with high flow rate and low initial pressure drop

Specifications

ISO 16890 efficiency	ISO ePM10 60%
EN 779-2012 efficiency	M5
Weight	580 g/m ²
Thickness	25 mm
Media	Polyester fibers impregnated with sticky resin + weft
Maximum temperature	120°C
Relative humidity	100%
Initial pressure drop	36 Pa
Recommended final pressure	250 Pa
